

IN CONSULTING

ICT SERVICES & CONSULTING

Info Novitas d.o.o. is fast growing company from Croatia. Our founders are professionals with significant experience in IT industry and project management. This experience enabled us broad knowledge in various ICT domains.

Our consulting services are oriented on small, middle and big companies, which find our expertise very important for further growth and process development. The goal of our consulting services is to improve existing business, project and developing processes, and business risk reduction.

Business values that we are trying to transfer to other firms are oriented to: business processes improvement, quality project management, productivity enhancement, and reduction of different types of operative risks.

Our experts will help you choose right hardware support and business software and find best price performance ratio.

We will help you in integration of your existing "in-house" solutions, in making decision about buying new commercial or developing specific solutions in accordance to your needs and possibilities.
