ANDROID SOLUTIONS

Last year more than 50% of sold mobile devices were Android devices. If You want that Your application has access to a **very big number of users** through Google Market application, or if You want just an application for Your employees - You came to right place!

Don't miss plenty opportunities that Android gives You! With our help make Your idea to a real application! User interface that we design especially for You will be very simple to use, intuitive and optimized, so Your clients will have very good feeling when using Your application. Use advantages that Android has for You and choose our team for implementing these advantages into Your new application!

IPHONE SOLUTIONS

Apple iPhone mobile devices have excellent hardware and software which enable executing complex applications. People find Apple devices **very easy to use**. We offer development of simple / complex applications for this platform. While designing,

Your idea and contribution is very helpful to us. If You have an application concept, we will take care of rest.

We design user interface to comply all your needs. Our team will test Your application over and over, so there will be no place for program bugs and application will operate fast and optimal.

WINDOWS PHONE SOLUTIONS

Recognizable user interface, integration of operating system with other programs and services, using recognizable Microsoft Office package and many other characteristics - this is result of many years of work and development.

Info Novitas develops Windows Phone applications by tracking best practical examples and listening to Your needs.

We use modern applications and technologies with goal to ensure quality and customer satisfaction.

UNIVERSAL HTML5 MOBILE SOLUTIONS

If You need **platform independent** solution, and if You need solution with very large number of users - use HTML5!

We use jQuery Mobile technology for better implementation of Your quality and effective HTML5 solution. jQuery Mobile is based on jQuery framework which is known as ideal solution for our company.

jQuery Mobile code is light, flexible and easy customizable. It guarantees quality and multiplatform solutions. Make sure that Your application will be available every time and everywhere, without worries for platforms that Your clients use!
